

Optum — Power BI Visualization Proposal

1 - Business Objective

- CEO's requirement - Optum Insights wants a visualization tool that helps management understand:
 1. **Where are we winning?**
 2. **Where are we losing?**
 3. **Where are the opportunities to reduce healthcare costs / generate savings?**
 4. **Why are we winning or losing?**
 5. **What action should be taken?**

2 - Market Research — Optum:

- Optum is a **healthcare services, technology, data, analytics, care-delivery and pharmacy business** that is part of **UnitedHealth Group (UHG)**.
- Link -> <https://www.optum.com/en/>
- Two main side of Optum:
 1. **Personal / Consumer side** -> How can Optum help me as a person/patient?
 2. **Business side** -> How can Optum help an organization improve healthcare and control costs?
- Three core :
 - **Optum Health** - Delivers **comprehensive, patient-centered care** to drive better outcomes and experiences for patients and care providers at a lower total cost of care.
 - **Optum Insight** - Connects the health care system with trusted services and **analytics** to make clinical, administrative and financial processes simpler and more efficient.
 - **Optum Rx** - **Integrates pharmacy, medical and behavioral care** through its full spectrum of pharmacy services to give people affordable access to prescription medications and therapies

3 - Roles or Potential Users:

1. CEO / Executive Management
2. Business / Strategy Team

3. Finance Team
4. Network / Provider Management
5. Clinical / Care Management
6. Operations Team
7. Sales / Account Management
8. Data / BI Analysts

4 - Question We need to Ask to the client:

1. **What is winning actually mean =>**
 - a. Revenue growth ?
 - b. Higher customer retention ?
 - c. Member growth?
2. **What is the comparison?**
 - a. Previous year ?
 - b. Budget ?
 - c. Target ?
 - d. Competitors/benchmarks ?
3. Do we already have an **estimated savings methodology** ?

5 - Five basic KPIs for the CEO:

KPI	CEO wants to know
1. Total Members	How many people are we serving with locations?
2. Revenue	How much business/revenue are we generating?
3. Medical Cost Ratio (MCR)	How much of our revenue is going toward medical costs?
4. Member Growth %	Are we growing or losing members?
5. Potential Savings	Where can we reduce unnecessary healthcare costs?

6 - Data Source Required :

Data Source	What we need it for
Member / Enrollment data	Members, growth, demographics
Medical Claims	Medical cost, utilization, services
Pharmacy Claims	Drug cost and utilization
Provider data	Provider performance and network analysis
Financial data	Revenue, cost, margin, targets
Quality data	Quality/outcome measures
Geographic data	Region/state/market analysis
Benchmark / Target data	Compare actual performance against target
