

# Optum Insight – BI Visualization Proposal

Short client discovery summary | Ideas2IT

## 1. Company Overview

**Optum** is a healthcare services and technology company within UnitedHealth Group. Its three core businesses are **Optum Health** (care delivery), **Optum Insight** (healthcare data, analytics and technology) and **Optum Rx** (pharmacy services).

**Project focus:** Optum Insight. The proposed BI solution will help identify where performance is strong, where it is below expectations, and where there may be opportunities to reduce cost or improve efficiency.

## 2. Target Users & Key Questions

| User                       | Role / Key question                                                                        |
|----------------------------|--------------------------------------------------------------------------------------------|
| CEO / Executive            | Overall performance; where are we winning, losing and where are the biggest opportunities? |
| CFO / Finance              | Cost, savings, leakage, margin and ROI.                                                    |
| COO / Operations           | Process efficiency, volume, turnaround time and operational cost.                          |
| Claims / Payment Integrity | Claims errors, denials, overpayments, duplicates and recoveries.                           |
| Provider / Network Manager | Provider cost, utilization, quality and benchmark gaps.                                    |
| Clinical / Medical Leader  | Utilization, outcomes, readmissions and care gaps.                                         |
| BI / Data Analyst          | Drill down into customers, regions, providers, claims and trends.                          |

## 3. Questions to Ask Optum

- What does **winning** and **losing** mean in their business?
- What savings should be identified: medical, operational, payment, pharmacy or provider?
- Who is the primary dashboard audience?
- What KPIs, targets and benchmarks are already used?
- How are **actual savings** and **potential savings** calculated?
- Which data sources are available, where are they stored and how often should they refresh?
- What security and access requirements apply?

## 4. Required Data Sources

**Claims** – claims, procedures, diagnosis, billed/allowed/paid amounts.

**Member** – member, plan, enrollment and geography.

**Provider** – provider, specialty, location and network.

**Payment** – payments, adjustments, overpayments and recovery.

**Clinical / Utilization** – admissions, ER, readmissions, length of stay and outcomes.

**Pharmacy** – drugs, prescriptions and pharmacy spend.

**Financial / Contract** – revenue, cost, margin, contracts and targets.

**Quality / Benchmark** – quality measures, targets and comparison benchmarks.

**Savings** – opportunity, estimated savings, actual savings and intervention.

## 5. User Roles & Key KPIs

| Role               | Key KPIs                                                                                |
|--------------------|-----------------------------------------------------------------------------------------|
| CEO                | Revenue, Cost, Actual Savings, Potential Savings, Savings %, ROI, Performance vs Target |
| CFO                | Spend, Cost Variance, Margin, Actual/Potential Savings, Leakage, Recovery, ROI          |
| COO                | Volume, Turnaround Time, Error Rate, Productivity, Operational Cost, SLA %              |
| Claims / Payment   | Claims Volume, Denial %, Payment Accuracy, Avg Claim Cost, Overpayment, Recovery        |
| Provider / Network | Provider Spend, Cost/Member, Utilization, Quality Score, Benchmark Variance, Savings    |
| Clinical           | ER Rate, Admission Rate, Readmission Rate, Length of Stay, High-Risk Members            |
| Pharmacy           | Pharmacy Spend, PMPM, Prescription Volume, Generic %, Specialty Drug Spend, Savings     |

## 6. Power BI Business View

**Winning:** performance better than the agreed target/benchmark.

**Losing / Underperforming:** performance below the agreed target/benchmark.

**Savings Opportunity:** a measurable gap where an intervention may reduce cost or improve efficiency.

**Dashboard:** Executive Overview → Financial & Savings → Claims & Payment → Provider → Clinical → Pharmacy → Opportunity Explorer.

Note: Exact KPI definitions, benchmarks and savings calculations should be confirmed with Optum during discovery.
